Penultimate-year Computer Science Engineering student (Class of 2027, GPA: 9.24) with strong foundations in **Software Engineering, Web Technologies, and Scalable Backend Systems**. Hands-on experience building **secure, high-performance applications** using JavaScript, Java, Node.js, and React, following **Agile software development methodologies**. Proven ability to collaborate in cross-functional teams, manage multiple projects, and deliver user-centric solutions.

EDUCATION

- Chitkara University**
Bachelor of Engineering – Computer Science(Penultimate Year); GPA: 9.24
Courses: Data Structures & Algorithms, Operating Systems, Computer Networks, Artificial Intelligence, Object-Oriented Programming, Cloud Computing, System Design.
Punjab, India
July 2023 - June 2027

SKILLS SUMMARY

- Programming:** Java, Python, C++, C, SQL, JavaScript
- Frameworks & Platforms:** Node.js, Express.js, React.js, Linux, Windows, HTML
- CS Foundations:** Data Structures, Algorithms, OOP, System Design, OOPs, REST APIs, Microservices, SDLC, Agile/Scrum, Workflow Automation, Databases(MongoDB, MySQL)
- Cloud & Tools:** AWS (Basics), Docker, Git, Postman, MongoDB, MySQL, CI/CD (Basics), PowerPoint
- Soft Skills:** Leadership, Event Management, Public Speaking, Time Management, Teamwork, Problem-Solving

EXPERIENCE

- Chitkara Smart City Research Laboratory In collaboration with Taiwan Government**
Research Contributor
December-2024 present
 - Contributed to **software engineering and data-driven research projects** for smart city infrastructure systems.
 - Engineered **REST APIs and cloud-integrated dashboards and REST APIs** for real-time data access, improving efficiency by **20%**.
 - Collaborated with a cross-functional team using **Agile sprints** to design predictive ML systems on large IoT datasets (100K+ rows).

PROJECTS

- [SheWell – AI-Powered Women’s Health & Wellness Platform \(AI/ML, Healthcare, Web Development\)](#)**
 - Developed a **full stack AI wellness platform** integrating predictive tracking, health consultations, and real-time assistance.
 - Built **scalable REST APIs** and automated data workflows, **reducing manual tracking by 50%**.
 - Designed **modular backend architecture** emphasizing reusability, scalability, and code quality.
 - Followed **Agile methodology** for iterative development, peer code reviews, and version control with GitHub.**Tech:** Node.js, React.js, MongoDB, Express.js, React Native(for mobile app), React Leaflet
- [Real-Time Location Tracking System \(Web Development, Geolocation, Mapping\)](#)**
 - Engineered a **real-time GPS-based tracking system** with socket communication for instant map updates.
 - Achieved **30% faster updates and 20% lower bandwidth** usage through optimized backend queries.
 - Designed clean, user-friendly UI components with responsive layouts.**Tech:** JavaScript, Node.js, Express.js, EJS, CSS, MongoDB, Leaflet.js
- [Digi-Vote India – Blockchain Voting Platform \(Blockchain, Web3, Voting System\)](#)**
 - Designed a **secure digital voting prototype** ensuring anonymity and fraud prevention using blockchain.
 - Built **smart contracts** for vote storage and verified results via blockchain APIs ensuring **transaction-level security and auditability**.
 - Integrated with React frontend for **seamless web3** interactions and decentralized data integrity.**Tech:** Solidity, Hardhat, React.js, MetaMask, IPFS, Express, Tailwind CSS

ACHIEVEMENTS

- National Winner IISF S&T Hackathon 2025 (Govt Of India)** – Declared National winners among 3000+ students in the India International Science Festival by Government of India and all national Science Agencies.
- Special Recognition Award – Priority HackFest 2025:** Built innovative AI-Based suite solution to improve priority’s workspace productivity.
- Finalist – J.P. Morgan Chase Code for Good** : Selected for the 24-hour social impact hackathon; built tech solutions for NGOs under JPMC mentorship.
- Dean’s List** : Recognized for **academic excellence** by securing a place on the **Dean’s List** in the first year.
- Hackathon Finalist(5X):** Ranked among the top 5 teams in the events building Innovative frontend and AI-full-stack projects.
- Top 5 – HackWithHer Hackathon 2025 (IEEE & Edifecs):** Built an AI-driven health-fintech integration system for women’s wellness and medical claim automation

LEADERSHIP & EXTRACURRICULARS

- Actively solving 400+ problems on LeetCode and Codeforces;** focused on **problem-solving and algorithms**.
- Class Representative** – Three consecutive years of academic and event leadership
- Mentored peers in **Git/GitHub workflows**, Agile collaboration, and project version control.
